

**Hotel-line's easy-to-use web booking tool delivers unparalleled cost savings and management control to mid-large scale corporate users.**

**Enforce corporate travel policies, sort and rank preferred suppliers, steer bookings to selected hotels and obtain up-to-date statistics in real-time for bookings, hotels and many other travel related topics.**

#### WHAT OUR CLIENTS SAY...

“In the first 12 months of using Hotel-line's web booking tool, we achieved an on-line adoption rate of 82% and real cost savings of 22%.”

E C Harris LLP  
International Built Asset Consultancy

#### WHAT WE SAY...

“Flightline's online tool achieves exceptionally high levels of acceptance within the corporate traveller communities because it is so easy to use.

‘Easy of use’ and user buy-in is key to achieving real cost savings. The Hotel-line web tool achieves this very well.”

Tony McDaid  
Sales Director

During 2010, 1.5 million room nights were booked through Hotel-line's web booking platform. This accounted for a total spend in excess of £500m.

With corporate spend on hotel nights increasing in most industry sectors, the need to control and manage the business traveller's accommodation and associated costs has never been stronger.

Hotel-line's web-based booking tool enables mid and large scale organisations to manage their travel arrangements more efficiently and with far greater management control.

#### KEY BENEFITS

##### Cost savings

- Reduce average room rate via preferred supplier consolidation
- Control hotel spend by rate capping countries and cities
- Book client corporate rate or Hotel-line negotiated rates
- Last room availability, free Wi-Fi, free parking, late check-out etc
